Albinus On Anatomy

Bernhard Siegfried Albinus (1697 - 1770) was a German-born Dutch anatomist which probably explains why even in the eighteenth century, his drawings were so accurate. This anatomy book is a compilation of work from two books he wrote at that time, *Tabulae Sceleti et Musculorum Corporis Humani* (Tables of the Human Body) and *Tabulae Ossium Humanorum* (Table of the Human Bones).

published in Leiden in 1747, largely at his own expense. The artist and engraver with whom Albinus did nearly all of his work was Jan Wandelaar (1690–1759). In an attempt to increase the scientific accuracy of anatomical illustration, Albinus and Wandelaar devised a new technique of placing nets with square webbing at specified intervals between the artist and the ...
